

## F. Conclusions and Request for Concurrence

---

### 1. Conclusions

No impacts have been identified that either individually or cumulatively would result in significant effects to the environment. Furthermore, no issues have been identified that suggest the significance of the environmental impacts have not been clearly established. Therefore, a CDOT Form 128 is appropriate for documenting compliance with NEPA and FHWA's Environmental Impact and Related Procedures, 23 CFR 771, and will be submitted with the finalized Categorical Exclusion.

#### **Request for Concurrence on Categorical Exclusion**

Because it has been determined that no significant impacts would occur as a result of construction on this project, and that there are no other unusual circumstances disqualifying this project under Categorical Exclusion criteria as defined in 23 CFR 771.117, we request your concurrence for Project CC 0402-075. The attached CDOT Form 128 reflects this proposed approach. Please review and sign the attached CDOT Form 128 if you concur with this category designation.
