Use Common Sense When Thawing Out Frozen Pipes

Steamboat Springs – January 11, 2010

With temperatures plummeting, there is ultimately a danger of pipes freezing in and around your home causing pipes to crack and leak.

Steamboat Springs Fire Rescue encourages citizens to use common sense when attempting to thaw out frozen pipes. Call a professional plumber to assist you, but under no circumstances attempt to use open flames to thaw out a frozen pipe. Using open flames increase the potential for unwanted flammable material to catch fire putting everyone at risk.

Please contact Steamboat Springs Fire Rescue at (970)879-7170 with any questions or for additional information on this topic.
