

LANDSCAPING IN THE RIGHT-OF-WAY PROHIBITED

The City Public Works Department would like to remind all homeowners to avoid placing large landscape materials such as berms, trees, and boulders within 10-15 feet of the street driving surface and/or within 15' of fire hydrant. This right-of-way area, which is typically 30 feet from the centerline of street, is used for snow storage and utility line installation. Landscape materials may

damage street maintenance equipment or have to be removed because of utility work in the area.

The City will not be responsible for damage to landscaping materials or irrigation systems, etc. that are placed within any public right-of-way.

Your cooperation now will help the snowplow crews provide timely and cost effective snow removal service in the future, and will help utility companies avoid damage to your landscaping during maintenance, repairs or replacement procedures.

EASEMENT RESTRICTIONS

The public easement dedications preclude the construction of fences or other improvements or the placement of landscaping or other materials within the easement areas that could impair the use of the easement as provided for in such dedication.
