

**On-Call Fire Protection Engineer Services  
Fire Sprinkler and Alarm Review/Inspection  
Request for Proposal  
Addendum #1  
Issued: May 22, 2019**

To: All Planholders of Record

This addendum modifies the RFP documents as noted below.

Questions submitted by May 21, 2019:

1. How many field inspections are expected during the contract period?
  - *Most field inspections would be done by the Fire Dept. This requirement was added for the possibility of a large project posing more demand than the Fire Dept. can accommodate.*
  
2. How much advance notice will be given prior to a field inspection?
  - *If a project like is mentioned above is identified I think 5 working day notice prior to inspection is reasonable due to possible travel and scheduling concerns, but I am open to suggestions.*
